SUMMARY

Psychologist and Researcher transitioning into Data Science, with hands-on experience applying statistical analysis and machine learning to understand human behavior and support evidence-based decision-making. Skilled at transforming large-scale behavioral, social, and public health datasets into actionable insights through predictive modeling, data visualization, and exploratory analysis. Strong track record collaborating with multidisciplinary stakeholders and communicating complex findings to inform organizational and policy decisions.

TECHNICAL SKILLS

Python (Pandas, NumPy, Scikit-learn), SQL, Power BI, Excel, Exploratory Data Analysis (EDA), Predictive Modeling, Data Visualization

DOMAIN EXPERTISE

Behavioral Data Analysis, People & Population Analytics, Psychology & Behavioral Science, Quantitative Research, Social & Public Health Analytics

EXPERIENCE

Data Analyst - Secretaría de Planeación, Gobernación de Boyacá (2025-2026)

Red de Observatorios Sociales y de Género

- Analyzed large-scale behavioral, demographic, and public health datasets to generate insights supporting strategic planning and evidence-based decision-making.
- Built predictive analyses to identify healthcare utilization patterns and inform resource allocation.
- Developed interactive dashboards using Python and Power BI for stakeholders.
- Collaborated with multidisciplinary teams to translate complex analyses into actionable recommendations.

Research Assistant - MINCIENCIAS / Corporación Vínculos / Community Mental Health Projects (2023-2025)

- Supported qualitative and quantitative research initiatives focused on mental health, social wellbeing, and conflict-affected communities.

PUBLICATIONS

Co-author, article published in TPM – Testing, Psychometrics, Methodology in Applied Psychology.
Available at: <https://tpmap.org/submission/index.php/tpm/article/view/4280>

SELECTED PROJECTS

2nd Place - First Latin American Datatón on Gender and Public Health Data Modeling (Bogotá, 2026)

Applied statistical methods to understand human behavior and decision-making using large-scale datasets.

Predictive Analysis of Medical Service Demand - Boyacá

Analyzed 126,000+ healthcare service records. Developed predictive models and dashboards to support evidence-based policy decisions.

EDUCATION

2025 | Bachelor's Degree in Psychology - Pontificia Universidad Javeriana

2026 | Specialization in Data Science (in progress) - UNAD

LANGUAGES

Spanish (Native) | English (Advanced - Professional Working Proficiency)
